Study counts
Observed maximum
Significance threshold
(a) Open−label TADs
J = 15
max$_j$ b$_j$ = 7.476
$\bar{b}(0.05)$ = 20.475
Number of studies
Standardized absolute difference, b$_j$
(b) PAT
J = 8
max$_j$ b$_j$ = 2.312
$\bar{b}(0.05)$ = 5.671
Number of studies
Standardized absolute difference, b$_j$
Study differences are descriptive; they cannot detect a bias shared by all studies.
